~~CONFIDENTIAL~~

ENCL. #1

13 March 1964

SUBJECT: Status of ADP in D/GC

1. Experience

The use of ADP in the Division began 2 years ago with the enter-
ing of the Moscow Street Index onto punched cards. From this evolved
a names-handling technique called Georym (in-house name is now Operation
Pressmap). A periodic publication, USSR, Communist China, and Mongolia:
Index to Plans of Selected Cities, was placed on cards to facilitate
production. Currently, two maps -- Leningrad and Jammu and Kashmir --
are being compiled in the Georym manner.

2. The Future

Following a feasibility study by the Office of Computer Services
(OCS), an automated system of recordkeeping and printout is now being
considered by the Machine Division. Also under study is the introduc-
tion of a flexowriter to prepare paper types for the Photon machine and
automated drafting equipment and techniques.
